Definitions of Scroll Bar on the Web:

A scroll bar is a tall thin hollow box that appears at the side of a window. You can use mouse commands in the scroll bar to scroll the window. The scroll bar feature is supported only under windowing systems. See section P.13 Scroll Bars.
www.gnu.org/manual/emacs-21.2/html_chapter/emacs_39.html

A scroll bar is a tall thin hollow box that appears at the side of a window. You can use mouse commands in the scroll bar to scroll the window. The scroll bar feature is supported only with X. See Scroll Bars.
sunland.gsfc.nasa.gov/info/emacs/Glossary.html

In a graphical user interface system, the narrow rectangular bar at the far right of windows or dialog boxes. Clicking on the up or down arrow enables you to move up and down through a document; a movable square indicates your location in the document. Certain applications also feature a scroll bar along the bottom of a window that can be used to move from side-to-side.
www.oit.ohio-state.edu/glossary/gloss4.html

A bar along the right and/or bottom edge of a window. A window gets its name by being a "window" into a larger display area. The scroll bar has a button inside it called the handle which represents the window's position within this display area. You can scroll up or down one window by clicking either above or below the handle. You can also drag the handle to a new location to directly move to that portion of the display area. Finally, arrows on either end of the scroll bar scroll a small amount in that direction when clicked.
www.helpdesk.umd.edu/topics/definitions/2594/

A scroll bar is a tall thin hollow box that appears at the side of a window. You can use mouse commands in the scroll bar to scroll the window. The scroll bar feature is supported only with X. See section Scroll Bars.
www.lns.cornell.edu/public/COMP/info/emacs/emacs_40.html

A control with which the user can change the portion of a document displayed within a window. Windows can have a horizontal scroll bar, a vertical scroll bar, or both. A vertical scroll bar lies along the right side of a window. A horizontal scroll bar runs along the bottom of a window. Inside the scroll bar is a rectangle called the scroll box. The user can move through a document by manipulating the parts of the scrollbar.
www.dbai.tuwien.ac.at/proj/DejaVu/document/glossary.htm

The rectangular strip that appears on the right and/or bottom edges of a Web page when there's more information than is currently displayed. You can "click" on its gray area and/or use the scroll arrows and scroll box to move the Web page's contents.
wings.avkids.com/SPIT/glossary.html

The vertical and horizontal edges of windows that feature arrow icons and a small box - called a scroll box - that allow different portions of a window's contents to be accessed by clicking on the arrows or moving the scroll box.
www.pitt.edu/~document/glossary/glossary.html

The scroll bar appearing to the right of the browser window when the document you access is longer than the browser window. The scroll bar lets you move down and up the web page when you place your arrow cursor on the up or down arrows of the scroll bar. If a web page is wider than the browser window, a horizontal scroll bar appears at the bottom of the browser window to allow you to scroll from left to right.
www.nassaulibrary.org/valleyst/Glossary.htm

The bar that appears on the right of most Word-processors' screens (and similar programmes). It appears as a thin strip with an arrow at either extreme and a small button somewhere in between. The position of this button indicates approximately where in the document you are at present and its size gives a rough idea of the size of the document (the smaller it is the larger the document). You can click on the arrows to scroll forwards and backwards in the document or grab the button (by clicking over it with the mouse key without unclicking) and sliding it up and down the scroll bar. Clicking elsewhere will cause the button to gravitate towards the mouse pointer effectively scrolling the document.

www.pads.ahds.ac.uk:81/glossary3.html

Refer to horizontal scroll bar or vertical scroll bar on the side of a window.

qcopy.csun.edu/help/glossary.htm

Usually a horizontal or vertical bar that contains a box that looks like an elevator in a shaft. Click on the bar to scroll the screen in the corresponding direction, or drag the box in the desired direction.

247.aw.com/html/glossary/s_gloss.html

The grey bars at the side of some windows. The view of the window can be moved by clicking on the box in it, the arrows at the end, on the grey scrolling area.

www.trincoll.edu/depts/cc/consult/documentation/manual/glossary.html

A bar that appears at the side and/or bottom edge of a window whose contents are not completely visible. A scroll bar contains an up arrow, a down arrow, and a scroll box, which you can use to view the window contents.

java.sun.com/products/javaviews/docs/lib/en/help/Home/Glossary.html

The scroll bar is a panel for moving the display horizontally or vertically within a window.

www.intelinfo.com/microsoft_word_glossary.html

Look to the right side of your screen. See the vertical gray bar with arrows? That's your scroll bar. Click on the arrows and the pictures move up and down. That's called scrolling. This allows a close up view and easy navigation. Now grab the placer box (that's the part that slides up and down when you click on the arrows). Now you're scrollin'!

www.rockisland.com/faq/glossary.html

The rectangular area on the right side of the window that allows you to move up or down in the open document. You move by clicking and dragging it or clicking on the arrow at the bottom of the bar.

www.webliminal.com/search/glossary.htm

The rectangular strip that appears on the right and bottom edges of a window when there's more information than is currently displayed. You can click in its gray area and use the scroll arrows and scroll box to move the window's contents.

www.lcmug.com/glossary_S.htm

a horizontal or vertical strip on the right or bottom side of a computer screen that allows the mouse to scroll a window up, down, left or right.

www.glenn-co.k12.ca.us/ham-hs/library/glossary.htm

A vertical or horizontal bar containing a scroll thumb and nudge buttons. Scroll bars can be used to move the current view in controls that need to display more data than their extent allows.

www.symbian.com/developer/techlib/v70docs/SDL_v7.0/doc_source/GlobalGlossary/GlossaryDocumentS.h

bar at the bottom or right side of the computer screen which you use to scroll up and down your screen to see contents that are not visible

library.kcc.hawaii.edu/external/hookele/susan/glossary.html

A special control that lets the user select which portion of a document is visible in a window.

developer.apple.com/techpubs/macosx/Carbon/HumanInterfaceToolbox/WindowManager/HandlingWindows

Use the scroll bar just as you would in any Windows program. Scroll bars may appear on both the right side (for scrolling up and down) and on the bottom (for scrolling left and right) when a page is too wide for the browser to display it.

www.waunakee.k12.wi.us/technology/Training/internettrainingglossary.htm

An area along one side of a window that enables you to control the vertical scrolling of text within the window.

www.rpi.edu/computing/docs/Memos/rpi112/node12.html

Used to change what part of a document is showing in a window when it is too large for all of it to fit.
